

C. AUTHENTICATION

The WHBC duty operator will require authentication of the emergency message. The operational area chairman will periodically issue code words to all notifiers for this purpose.

D. ON AIR HANDLING

Emergency communications from designated notifiers will normally be handled immediately, on the air live. The notifier will be introduced by the WHBC announcer on duty. Notifiers should have the emergency message well organized, preferably written. The message should be repeated after a 5-second pause following the initial reading. The WHBC announcer will close out with the EBS termination message. Notifiers will be provided a "procedure card", giving step-by-step instructions for requesting EBS activation. This card should be readily available and used in conjunction with assigned code words for authentication.

E. LOCAL ACTIVATIONS

Notifiers may request activation of the EBS on the local level by contacting the appropriate station listed in Annex B. Notifiers and local stations are encouraged to develop procedures to be used in event of localized emergencies. Paragraphs C and D above should be used as guidelines for these procedures. See Section V, Paragraph D for specific stations to be contacted by certain counties.

VIII. BROADCASTER'S PROCEDURE

A. WEATHER WATCH STANDBY

All broadcast stations in the East Central Ohio Operational Area will be alerted to severe weather watches issued by the National Weather Service via NOAA Weather Radio or the wire services. When a watch is issued, stations should prepare to record any possible warnings which may be issued through the EBS system. The entire EBS system will be considered on "weather standby" during a watch.

B. ACTIVATION PROCEDURES

Upon receipt of a request to activate the local or operational area EBS from an appropriate notifier (See Annex D) and authentication has been confirmed, the CPCS-1 or alternate CPCS-2 station, or local EBS station may proceed as follows:

1. Broadcast the following announcement:

**"WE INTERRUPT THIS PROGRAM BECAUSE OF A LOCAL EMERGENCY.
IMPORTANT INFORMATION WILL FOLLOW."**

2. Transmit the two-tone EBS attention signal.

3. At the end of the tones, broadcast the following announcement:

**"WE INTERRUPT THIS PROGRAM TO ACTIVATE THE EAST CENTRAL OHIO
OPERATIONAL AREA EMERGENCY BROADCAST SYSTEM, AT THE REQUEST OF
(NAME AND TITLE OF NOTIFIER). HERE NOW IS (NAME)."**

4. Broadcast Emergency program. Notifier should repeat the entire message after a 5-second pause.

5. To terminate the EBS emergency communications, make the following announcement:

"THIS CONCLUDES OPERATIONS UNDER THE EAST CENTRAL OHIO EMERGENCY BROADCAST SYSTEM. ALL STATIONS MAY NOW RESUME NORMAL BROADCAST OPERATIONS."

C. LOCAL REBROADCAST PROCEDURES

All local EBS stations in the East Central Ohio Operational Area, monitoring the CPCS-1 station (WHBC-FM 94.1 MHz) via their EBS monitor receiver/decoders, will be alerted by the two-tone attention signal. Each broadcast station, upon receipt of the EBS alert, will, at the discretion of station management, record the emergency message and follow the procedures in Paragraph B, (1) through (5), thus rebroadcasting the emergency programming received.

- D. To avoid unnecessary escalation of public confusion, all broadcast stations must be cautious in providing information and news pertaining to the emergency. All messages must be based on definite and confirmed facts. This can best be assured by using the notifier's own voice (actuality), live or recorded, during the EBS operations.
- E. Upon completion of the EBS transmission, appropriate notations must be entered in the station log. It is suggested that the FCC be notified of EBS activations by filing FCC Form 201.

IX. TESTS

In accordance with FCC Rules, WHBC-FM, the East Central Ohio Operational Area originating station, conducts an EBS (tone) test once per week between the hours of 8:30 A.M. and local sunset.* The dates and times

of such tests are recorded in the station log. All area stations should be sure their EBS monitors are working properly. Should a week go by without receiving a test, stations should immediately notify WHBC (CPCS-1). The phone number for WHBC is (216) 456-7166.

*A test may not be transmitted during a week in which an actual EBS activation has occurred.

X. RECOMMENDED STATION OPERATING PROCEDURES TO EFFECTIVELY

PARTICIPATE IN THE EBS SYSTEM

A. The success of this plan will hinge entirely upon the operating staff on duty at your station at the time of a weather warning or other emergency which justifies activation of the emergency broadcast system.

A COPY OF THIS PLAN ALONE CANNOT POSSIBLY BE CONSIDERED ADEQUATE FOR YOUR PERSONNEL TO USE AS A GUIDE AT THE TIME OF AN ACTIVATION. NOR CAN YOU DEPEND UPON THEM REMEMBERING WHAT TO DO AFTER STUDYING THIS PLAN. YOU MUST APPLY THIS PLAN TO YOUR STATION.

Therefore, a clear, concise, step-by-step operating procedure (readily available) for your operating personnel to use at the time of emergency is absolutely necessary if this plan is to be successful. Please use the information contained in this plan, and your knowledge of your station to write a procedure which your operating personnel can refer to at the time of an EBS alert.

Remember ... success of "over the air" relay depends upon your operator being able to rebroadcast the program of your feed station, or Common Program Control Station (CPCS). This is particularly important for WHBC-FM and WDJQ which serve as primary relay stations.

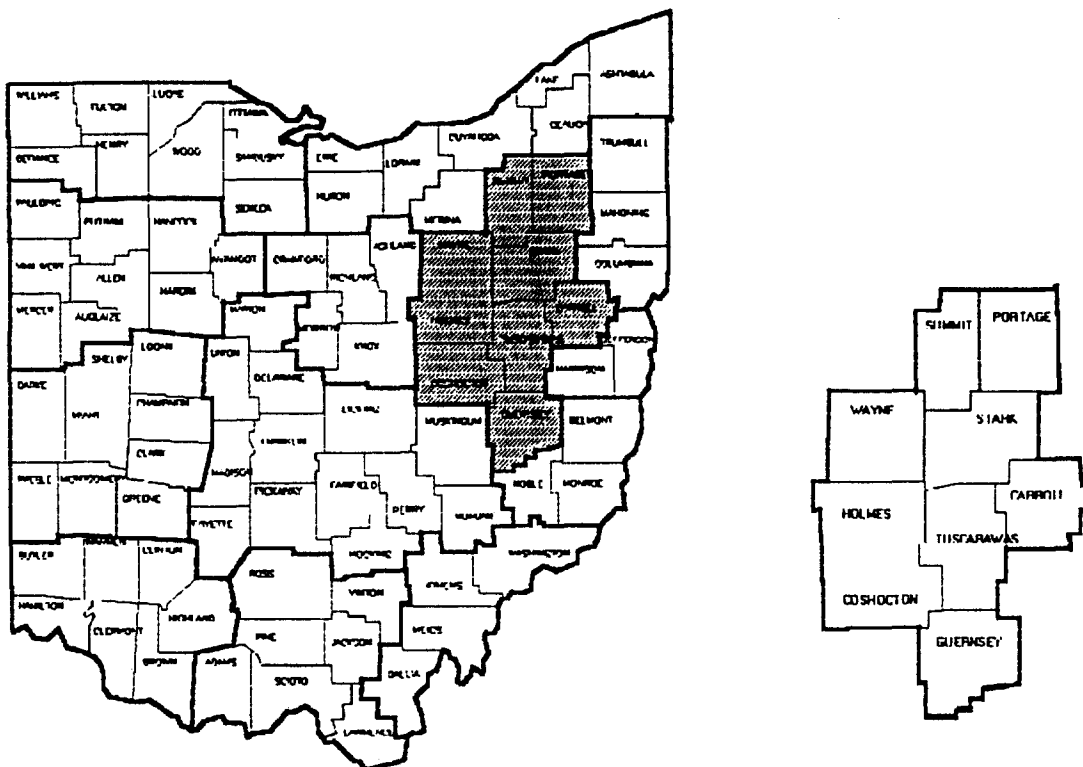

- B. It is recommended that your EBS receiver and a NOAA Weather radio monitor be hard wired to an input on the main audio control console. These inputs should be well labeled.
- C. Wire the audio from your EBS receiver to a tape recorder. Hook up a relay to automatically start the recorder when the EBS decoder operates.
- D. Placement of the EBS monitor receiver/decoder is critical. it must be placed where regular station personnel will hear it, should it activate, anytime the station is operating.
- E. Finally, write a step-by-step procedure which describes your EBS operation in detail. It should take into account possible variations in procedures for national state and local (weather) EBS operations. Then, hold a training session for your operators. Most important of all, ESTABLISH A PERIODIC RE-TRAINING PROGRAM TO ASSURE THAT NEW PERSONNEL ARE CAPABLE OF PERFORMING THE PROCEDURES.
- F. The East Central Ohio EBS system is an audio only system, but that does not restrict its use to radio stations only. Television stations may, just as radio stations run EBS messages Live, on tape delay, or through their own personnel. Television stations participating in the East Central Ohio EBS system should have an appropriate EBS cover slide ready at all times to insert as a visual during EBS messages.

G. Your operational area emergency communications committee chairman welcomes your questions and comments. Address communications to: Mr. William C. Glasser, Radio Station WHBC, P. O. Box 9917, Canton, Ohio 44701, Telephone: (216) 456-7166.

EBS DEFINITIONS

PRI CPCS-1 (Primary Common Program Control Station No. 1):

Primary radio station for originating local emergency broadcast information for the East Central Ohio Operational Area.

PRI CPCS-2 (Common Program Control Station No. 2):

Alternate radio station for originating local emergency broadcast information for the Operational Area.

PRIMARY RELAY: FM radio station used for relay of statewide emergency broadcast information.

PRIMARY: Station providing direct rebroadcast of emergency broadcast information to the public.
